

AUTOCROSS – SERIOUS FUN!

OREGON REGION SCCA SOLO WELCOMES YOUR INTEREST AND PARTICIPATION!

Let us introduce you to the fastest growing segment of the Sports Car Club of America (SCCA), Solo (autocross) competition. Autocross is the sport of trying to navigate your vehicle through a defined course faster than your competition. The course is defined by traffic pylons (orange safety cones) and each driver runs *solo* against the clock. Autocross drivers gain confidence in their driving as they learn how to drive at the limits of their vehicle's potential. Each course is different, thereby offering challenges to all drivers. The key to participation is to have fun and improve over time.

The sport is open to men and women with a separate ladies class and a class for every car – from showroom stock to super modified. The competition attracts a variety of participants – from those who are interested solely in improving their driving skills to the more serious contenders looking to compete on a National level. Local, Divisional, and National Tour events take place within a day's drive from the Portland area. The Oregon Region, based in Portland, is host to at least eight local events during the season; add an easy drive to Seattle or Eugene autocross events, and you can compete nearly every weekend throughout the summer.

Autocross competition affords the average individual to come test their car handling skills (and have fun doing so!) with nothing more than a helmet (we have loaners!) and your everyday car. It is not a spectator sport, autocross must be experienced from inside the vehicle. Only as a passenger going out on a "fun run" with a veteran driver or as a driver yourself, will you come to understand what all the excitement is about. It is the most intense 60 seconds you can imagine. You'll come out laughing (or shaking!) from the overwhelming feeling of exhilaration. Local participants who have been involved in the sport for over ten years still feel that excitement when they are about to launch from the starting line.

We'd like you to come feel that excitement. Aimed at newcomers, the information found here is intended to give you an overview of what you can expect and how to make your initial outing a pleasurable experience. We invite you to join the fun at an upcoming event. **You're in for a ride you won't soon forget!**

Follow the Solo link from <https://www.oregonscca.com/solo---autocross.html> for the latest season schedule, event details, competition results, standings and general information.

OREGON REGION SCCA SOLO EVENT PROCEDURES

Event information can be found at the Solo website. Note the starting times! Registration and Tech *will close promptly* at published times! Leave enough time to change tires (if applicable) before safety inspection and walk the course after registration. Arrive early so that you have plenty of time to ask questions and get situated. If you are running on street tires, *come to the event* with a minimum of 40 pounds and adjust as needed. This will reduce sidewall flex in your tires and greatly improve your vehicle's handling. Also, avoid setting the emergency brake between competition runs (if it is safe not to do so).

Basic steps of an Event:

- Register and pay for the event online by the Thursday night before the coming weekend's events.
- Arrive at the site, unload loose items from car, apply car numbers.
- Go to Registration (confirm class, car #, etc)
- Go to Work Assignment (find out when you are driving/working)
- Take car and helmet to Tech (technical inspection) with your run card so they can sign it.
- If you are driving first put your car in Grid (dual drivers in left lane with double cones). If you are driving second put your car back where you parked/unloaded. Put your run card under the driver's side windshield wiper.
- Walk the course.
- Attend mandatory Driver's Meeting.
- Event begins!

Registration Check-In: At each event, you will be required to sign a **liability waiver** and given a wristband which must be worn at all times while at the site. If you haven't already signed the Solo liability waiver upon entering the site, locate the Solo Registration table and sign the waiver. To compete, show your valid driver's license and SCCA membership card (if applicable), confirm car class and #, obtain your run card. Online registration is encouraged to make the event run faster and smoother. If this is your first time competing, the Registrar can help you determine the "class" of the vehicle you are competing in and assign a vehicle number. We have the Trophy Challenge class for novices. You won't need to worry about car classing and car modifications. Make a note of your assigned class and vehicle number as you will use this same class/number at every event you attend throughout the season. **Fill out the personal and vehicle information as requested on the run card** (your name, class, vehicle make, model, color, number, emergency contact). The run times will be filled out by Timing.

Work Assignment: Everyone must complete a work assignment. Give your completed run card to the Worker Coordinator; they will assign you a work position and indicate your Run/Work order on the run card. Your Run/Work order and work assignment will change with every event; be sure you understand your current work assignment before leaving.

Technical Safety Inspection: If you haven't already done so, remove all loose items from the vehicle, change tires (if applicable) and apply numbers. If you do not have magnetic or static numbers, Tech will have blue painter's tape to enable you to display your number and class of your vehicle so they can be clearly seen by Timing/Course Workers. Place your helmet and run card in the vehicle. Pull your vehicle up to the "tech" line, raise the hood and open the trunk. Your vehicle will be inspected for a secured battery, functional seat belts, solidly mounted seats, loose wheel bearings, fluid leaks, throttle return and solid brake pedal. Have your helmet available for certification inspection; helmets must be worn while competing and they must be **M or SA Snell rated** within the last three 5-year certifications (current and previous two year certifications). Loaner helmets are available). The Safety Inspector will place a mark of some sort on the windshield and your helmet to show they have passed inspection, and will sign off your run card. Place the run card under the wiper blade on the driver's side or, if it is raining, on the dashboard on the driver's side.

Park car: If you are driving first put your car in Grid. If you are sharing the car with another driver (dual driver), use the far left lane (usually) with dual cones. If you are working first put your car back where you parked and unloaded.

Course Walk: With the safety inspection and run card completed, it is now time to walk the course. As you leave the Start Line, do not be afraid to ask a more experienced driver to go for a walk with you. Most competitors are happy to share their knowledge. We usually have a Novice course walk for newcomers. Walk a minimum of three times if possible. Visualize the course at speed. Memorize as much as possible; breaking the course into sections may make it easier to remember. If you have any questions about the course, find an event organizer (Event Chair) and ask. No skateboards, roller blades/skates or bicycles are allowed oncourse.

Driver's Meeting: After a review of the rules and safety procedures, those drivers running first will get their vehicles to pre-grid; those working first will go to their assigned stations. After the first group is finished running, the workers and drivers will switch positions. All drivers will receive a minimum of three scored runs; all drivers **MUST** work.

Work Session: If working a station, be sure it is equipped with a red flag, fire extinguisher, extra cones and a radio to communicate with Timing. You will be responsible for reporting penalties (Corner Captain) or shagging cones for a particular section of the course (Runner); know where your particular section starts and ends. A veteran competitor should be put in charge of calling in penalties (Corner Captain). Watch and listen so that you can eventually take on this responsibility at a future event. The red flag must be kept in hand, held against the leg, and ready for immediate deployment. If in doubt, error on the side of safety! Pay attention to the vehicles for accurate cone counts and for your safety. Replace or reset cones as soon as possible. Keep in mind another vehicle will be coming through the section in 20-30 seconds. **Do not turn your back to vehicles on course.** Workers must be on their feet at all times when vehicles are competing. Be prepared for exposure to sun/rain, wind, heat/cold while on station. Every driver **MUST** complete a work assignment.

Safety: All persons entering the site must sign a liability waiver and display the waiver verification (wristband) in plain sight. Children and pets are not allowed in the grid, staging and course areas. Pets must be leashed at all times. Photographers in the course area must be accompanied by a spotter. No alcohol or drugs are permitted on site.

Provisions: Be prepared to dedicate a most of the day to compete in a local event; Divisional and National Tour events are generally two day events. Taking along the following items will make your outing more pleasurable!

Essentials:

- Sunscreen and wide-brimmed hat
- Umbrella and/or rain gear
- Tarp to cover your belongings in the event of rain
- Comfortable shoes you can run in while working the course. Open toed shoes are not allowed.
- Water/non-alcoholic beverages
- Snacks
- Tire pressure gauge
- Tire pump
- Magnetic/static cling car numbers & class. Painter's tape also works as long as it is a contrasting color.
- Notebook for taking notes (tire pressures, shock settings, etc)

If you are changing tires:

- Hydraulic jack
- 4-way wrench, speed wrench, or impact driver
- Torque wrench
- Extra lug nuts
- Gloves
- Knee pads

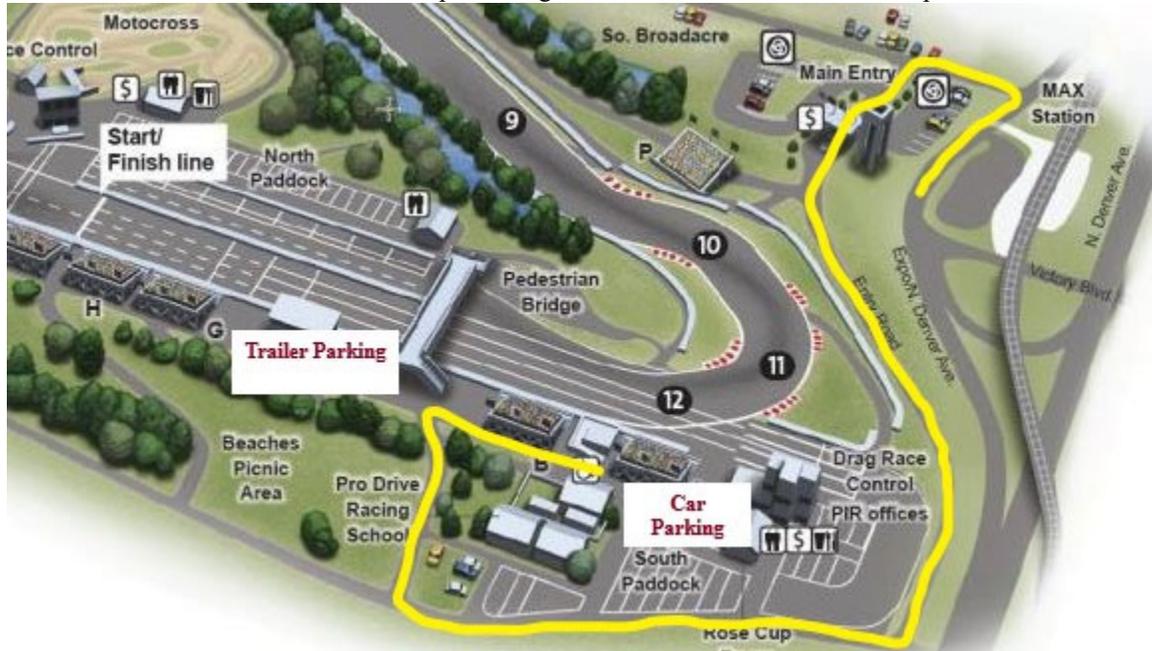

Nice to have:

- Folding chair
- Windshield cleaner
- Paper towels/rags
- Garden sprayer for cooling tires
- Tools for minor repairs; Socket set, wrenches, screw driver, shop manual
- Solo rulebook. Can be downloaded here: <https://www.scca.com/pages/solo-cars-and-rules>
- In case of protests at Divisional / National Tour / Pro Solo Events; Factory shop manual and the service bulletins are required

OUR MOST COMMONLY USED SITES:

Portland International Raceway – Portland, OR

Before entering the Portland International Raceway (PIR) main gate, you will notice a SOLO sign up area. Stop here to sign the liability waiver and receive the waiver verification (wristband) which must be displayed at all times while on the premises. Drive through the main gate and continue driving on the paved roadway going 'round the bend to the right. You will see the South Paddock on your right. Continue past the paddock and take a right at the paved road in between the grassy areas. Take another right when you get to the tee intersection at the bridge over the track. Cars can park in the South Paddock in the marked areas. Trailers must park along the trackside. Do not block roads/paths.

Hampton Mills – Packwood, WA

Packwood, WA is on Highway 12, 64 miles East of Interstate 5. The event site is at the old Hampton Mills lumber yard 1 mile west of Packwood. Don't be tricked by the active lumber mill in Randle, WA, keep going! When you see the Crest Trail Lodge on the left you are almost there! Watch the right side of the road for a brown 2-story house and large tan buildings in the back. The entrance is just past it the house.

Timing, Scoring, Trophies:

Courses are generally designed to be run in 45 to 60 seconds. If you have any questions about the course layout, ask an event organizer or bring it up at the driver’s meeting before competition begins. If it is safe to do so, a second competitor may be starting on the course while you are exiting, so it is important that you know exactly where you are going before you are at the starting line.

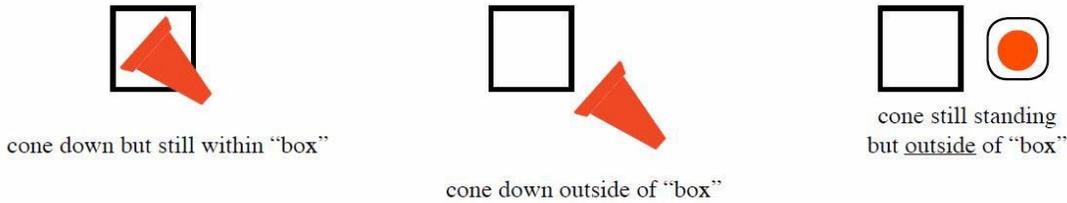

The first three runs at any given event are considered to be the “competition runs”. Only these three runs will be entered into the computer and used for scoring purposes. Times for competition runs are recorded to the nearest one-thousandth of a second. Scoring is determined by using the competitor’s lowest single time among the allotted competitive runs. Points are awarded based on finishing position. All drivers will receive a minimum of three scored runs per event. It is not uncommon for fifth or sixth runs (non-competitive) to be granted if time allows. These runs are recorded, but don’t count for the competition.

To be eligible for yearend trophies, you must be an SCCA member and have competed in more than half of the events which make up the Oregon Region Solo Championship Series. Points awarded in all events will count towards the point total, so the more events you compete in, the higher your point standing is apt to be. In addition to class-specific trophies, awards are given in many areas including Competitor of the Year, Driver of the Year and Worker of the Year. See the Oregon Region SCCA Solo Supplemental Rules for additional information.

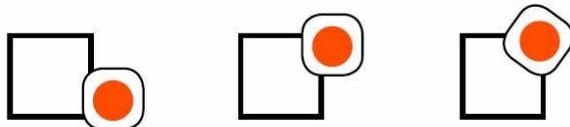

A brief explanation of penalties...

The position of a course marker (orange safety cone) is identified by a “box” which is drawn around each cone. If a vehicle displaces a cone as shown below, the driver is penalized two seconds. If the driver misses a “gate”, thereby going off course, a 10 second penalty is added to their run time. This occurs if a competitor misses a section of the course or fails to pass through all sections of the course in the order intended by the course designer. No penalty is assessed for hitting a pointer cone!!

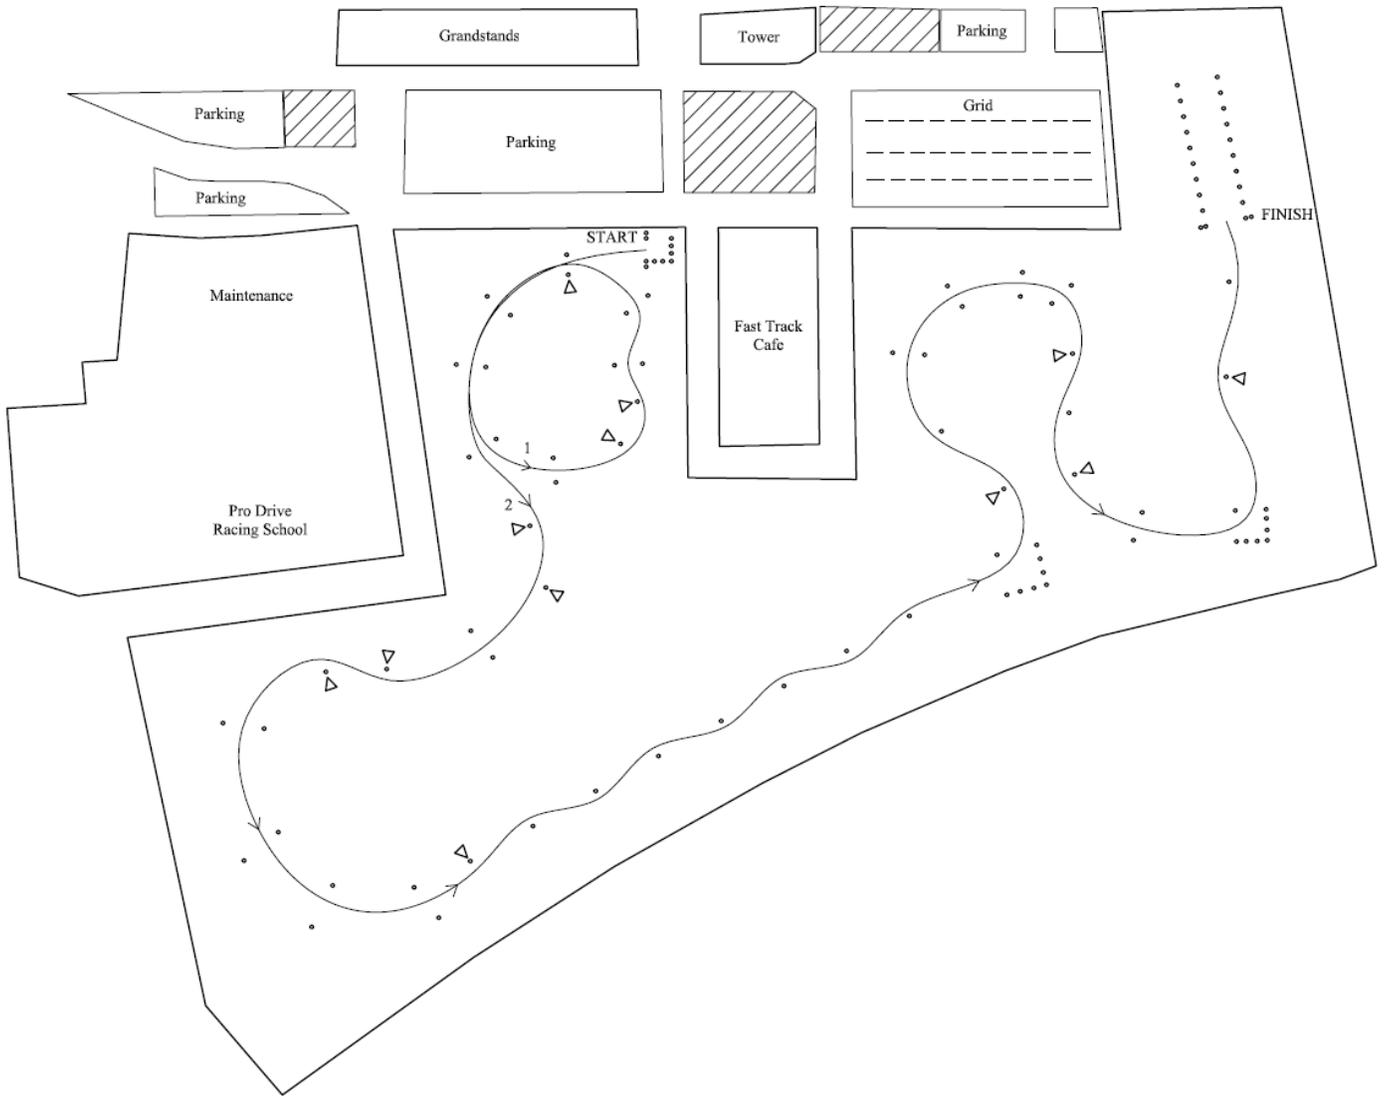

NO PENALTY is assessed if the cone is STANDING AND STILL TOUCHING “BOX”...

Sample Course: Although the course layout is different at each event, you can expect to see many turns of varying radii, directional and optional slaloms, and short straightaways. Penalties are assessed for hitting cones before the start line and after the finish line. Autocross competition is truly a test of your driving abilities and with each event your skills are bound to improve. Initially, you can expect to realize great improvements in your times, but as you reach the levels of veteran competitors you will find out that the competition is often won by tenths, hundredths or thousandths of a second.

The following is an example course map of a PIR event. When you walk the course, the dots (cones) and triangles (pointer cones) will begin to make sense. We suggest you grab a partner and walk the course a minimum of three times before going out for your first run. Be sure to walk the course as it will be the only chance you will get to study the course in detail before your first run.

TAKE ON THE SOLO CHALLENGE!

With event attendance increasing, it is important for everyone to help out whenever possible by following some simple rules:

- **Fill out your run card completely, accurately, and write CLEARLY!!!!** You'll be helping Registration, Worker Coordinators and Timing with performing their tasks more efficiently
- **Run in your assigned run group.** Unless you have a very good excuse (as determined by Event Chair), you need to run as designated; this not only ensures track/weather conditions are the "same" for the entire class, it keeps sessions more manageable in size
- **If you want to play, you must work.** Everyone driving will be given a work assignment. Work can be useful! Use the time to watch how other drivers handle different sections and learn from their efforts
- **Help pick up after the event.** Those cones get mighty heavy at the end of a long day, especially for the Event Chair and those that spend the full day at the site putting on the event. Do your part; pick up cones, gather the fire extinguishers, red flags and radios, help pack up the timing equipment. Then go change your tires!
- **Pack out your own trash.** The Event Chair shouldn't need to clean up the site of bottles and garbage. Sites are hard to come by and we want to be invited back so find the on-site garbage cans or pack out your own trash. Your Club volunteers really prefer not to take your garbage home with them!

Registration and Tech will close promptly at the listed time!

There's a lot to do in that first hour or so after you arrive at the site; change tires, register, complete run card, tech vehicle, walk the course. DON'T BE RUSHED OR MISS OUT ON ALL THE FUN. BE ON TIME! Due to increased attendance, it is more important than ever that registration and tech times are adhered to so that the people running the event can complete their tasks for the competition to begin as scheduled. Remember that the people running the event are competitors, too! They all need time to walk the course and prepare their vehicles, just like you do! So, don't get frustrated when Registration and Tech close. Just remember that many other people made it on time to have fun that day and you can too!

You are responsible for determining your class.

Refer to the Solo Rule Book (which you can download from www.scca.com) to determine the class your vehicle belongs in; Street, Touring, Prepared, or Modified – and make a note of it! Remember, if it is not classed correctly, you may be protested and lose your points standing.

Then determine which class you want to run in. Several options are available as outlined below. Be sure to list your class correctly when filling out your run card.

- **Main Classes** – Open to men and women. See rulebook.
- **Ladies** – Same as main classes, but restricted to women
- **Pro PAX** – For drivers who have trophied at a National or Tour events.
- **Trophy Challenge** – For novice drivers. Classes are not taken into account so you don't need to worry about which mods put you in which class. Just drive what you have while you learn!
- **Time Only** – Non-competitive/non-indexed timed runs.

These and more classes are defined in the Solo Rule Book and the Supplemental Regulations. If you need help, someone at Registration can assist you – just ask!

**SOLO... serious competition...
friendly competitors!**

Let's talk about Grid Etiquette

While most clubs only give you three runs for your money, we give four runs when time permits! These are a few things you can do to help the grid workers work more efficiently and ensure that there is enough time to get in four runs (and still be running in daylight!)...

- Fill out your run card completely and accurately
- Place your run card under the wiper blade when lining up in grid for your first run
- Return to the same line you were assigned to
- After your run, stay with your vehicle until the line has moved into its original position
- if you are given a re-run, wait to receive running instructions from the grid master or starter

Course Worker Instructions

Remember, this is a very important job!!

Two or more people will be assigned to work a specific station. They are responsible for carefully watching as each vehicle passes through their assigned section of the course. They are to report any penalties (missed gates, displaced cones), safety violations (leaking fuel or oil), and reset any cones which have been displaced by the vehicle. Always be ready to throw the red flag.

Here are a few tips to remember when it's your turn to work the course...

DO...

- Know your area of responsibility
- Make sure your station has extra cones, fire extinguisher, red flag, radio
- Make sure all the cones in your area are in the proper place when you first come on station
- Know the “down or out” rule for assessing penalties
- If a cone is displaced resulting in a penalty, raise it above your head to signal the penalty and then reset the cone inside the “box”
- If a cone is displaced but a penalty is *not* to be assessed, reset the cone inside the “box” and give a “safe” (as used in baseball) or “no penalty” signal to the radio person at your station
- Pay attention to the cars on course for accurate cone counts AND for your safety
- Stand, do not sit, at your assigned station – you must be ready to move quickly at all times
- Replace cones as soon as possible – *run*, don't walk!
- If only two people are assigned to work a station, one person should hold the radio and red flag; the other person runs to reset displaced cone(s)
- If you are a flag person, hold the red flag in your hands at all times, unfurled by your side, and be ready to throw it when called for
- The person holding the red flag does *not* also have the responsibility to reset displaced cones – no running oncourse with the red flag unless you are waving it!
- If a red flag is to be thrown, get the driver's attention without placing yourself in danger
- Know how to use a fire extinguisher – always aim at the base of a fire, never raise the hood of a vehicle on fire
- At the end of your work session, leave radios, fire extinguishers and red flags at the station for the next group of workers (turn radio off to save battery) if you are working the first run group
- At the end of your competitive runs, park your vehicle (no changing tires yet!) and quickly report to your assigned work station if you are driving the first run group
- Be prepared for exposure to sun/rain, wind, heat/cold

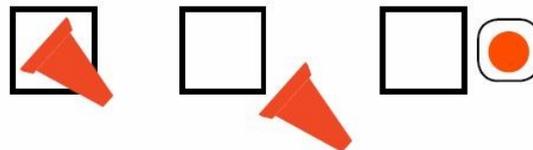

DO NOT...

- **Turn your back to the cars on course**
- Forget about the next car coming when replacing cones
- Sit down or wander away from your post
- Wave the red flag unless instructed to do so OR if it is an emergency... if in doubt, error on the side of safety!
- Turn radios to full volume – they will not transmit!
- Pick up car parts dropped on course – they may be HOT!
- Use a camera without permission and a spotter
- Litter!!

Penalties - the down side of competition!

We all strive for a perfect, clean run, but if you're pushing hard, you'll inevitably hit a few cones along the way! Here's an easy way to remember whether a penalty is assessed or not ...

If the cone is down or out of the “box”, a penalty IS assessed

(The flip side of this naturally is: if the cone is moved but is still *standing and touching* the “box”, a penalty is NOT assessed)

Also, a penalty is assessed if you miss a gate or you fail to pass through all sections of the course in the order intended by the Course Designer. You will receive a penalty of ten (10) seconds for every gate missed or a DNF (did not finish) if the penalties amount to more than we can count on one hand!

Stay away from the timing vehicle – it's a hot spot and there are no exceptions to this rule.

Direct any questions pertaining to timing or course rulings to the scoreboard person or the Event Chair.

Running on street tires?

Pump it up! Your air pressure, that is. Because street tire sidewalls are softer and tend to flex, you will need to run higher pressures than used on the street. *Come to the event* with a minimum of 40 pounds and adjust as needed. We'll show you how to mark your tires to determine proper pressure.

Competing in Street Tire Class? As listed on the sidewall, a tread wear rating of over 140 qualifies – class is open to Stock and Street Prepared vehicles only.

As an SCCA sanctioned body, Oregon Region must strictly adhere to the SCCA Rules and Regulations. Please abide by the rules.
